+7 495 230 15 12 Moscow, 3rd Khoroshevskaya St., 18 building 2 Competent asistieron savings Lighting gas station The choice of lighting for office commercial premises should be approached with great care because such premises are the place of a mass congestion of people for many hours of hard work. The wrong approach to the selection of lighting can adversely affect productivity by reducing up to 30%. Therefore, a led lighting system in the office should be chosen so that it can provide a high level of comfort throughout the working day. Led lamps are efficient and economical replacement of street luminaires with lamps DRL DNAT. The housing is made of aluminum profile weatherproof paint applied by a powder method. The external heat sink ensures effective heat sink. Are used for lighting footpaths roads, parks and gardens Parking lots and gas stations industrial areas railway platforms and platforms of loading and unloading ramps. House with beautifully crafted architectural lighting always looks bigger and more powerful and becomes the dominant among the neighboring buildings. Compact durable lights placed discreetly on the elements of the facade and is accented highlight the most expressive elements. Nice addition is the fact that lit at night the building increases safety and unappealing to intruders. A comfortable learning environment is an important factor in the implementation of the educational process. Classrooms are equipped with efficient led lighting can provide higher quality of education. Reducing energy consumption will free up needed funds for other pressing and important needs of the education system such as the purchase of new books computers and upgrading infrastructure. Lights for car wash must meet several requirements. First and foremost is the high degree of protection from moisture and dust. All the luminaires presented in this category have a degree of protection not less than IP 65. This means that they are completely protected from ingress of water and dust. Lighting of the car wash should also be bright enough but at the same time economical. Led lights consume 2 times less energy than similar fixtures with fluorescent lamps having a much higher light output. For lighting of Parking lots and Parking areas, any suitable types of led lights. In the main set of linear lamps and a ceiling height of about 3 meters. Led lights have a wide operating temperature range and are suitable
