analogue lighting systems for poultry incandescent lamps and fluorescent lamps

LEDLIFE POULTRY system developed for use in poultry and livestock

from 5 pieces for free

1. profile from high-strength polycarbonate resistant to aggressive media and high mechanical loads
2. end caps from a chemical resistant plastic material bonded with hot-melt adhesive. Design ensures tightness for the entire service life of the lamp
3. sector-to-sector connection diagram of the LEDs guarantees the normal operation of the lamp even in case of failure of one of the LEDs. The loss of the luminous flux in the lamp will account for no more than 3-10%
4. multilayer copper plate and the arrangement of light sources provide optimal temperature conditions of the lamp and minimize the degradation of the LEDs
5. use power supply with external Converter allows you to make it possible petrozoloto adjustment of illumination.
6. adjustment system signal 010B from arecomputer reduces the number of additional modules, which significantly increases the reliability of the system.

In maloznakomyh and broiler poultry houses with **outdoor content where the high light levels of the order of 50-100 Suite used lamps with a capacity of 11-21W. The radiation pattern of the led 120° allows virtually all luminous flux emitted downward and thus increase the efficiency of LED - lamps compared to incandescent or fluorescent.**

If the farm uses to keep the young or broiler **cage equipment with feed troughs, the best option of lighting is to use lamps with a power of 33 W 67 which are placed in the passages between the cells with the interval from 05 m to 2 m. This solution allows to cover the feed in the troughs at the level of 50-100 Lux and provides a comfortable environment for growing birds.**

To obtain competent advice to know the price or order lamps contact managers of sales Department or submit a callback request via the website. Without delay you will receive all the necessary information.

The company LEDLIFE offers low prices convenient terms of payment, delivery to Ukraine. All products are subject to compulsory quality assurance and after sales service.

If you have difficulty with the selection and installation of the lighting cannot determine the placement and quantity of lighting equipment company LEDLIFE provides professional services electrical design and installation of any complexity.
