LED lighting for poultry houses - is a specially designed system that takes into account all features of the maintenance and breeding of poultry on a commercial scale. In the development of LED equipment for poultry houses it is important to take into consideration the fact that the tools and lamps are to be operated in a fairly aggressive environment. LEDLIFE lamps are totally resistant to such conditions.

LED lighting for poultry houses - is a specially designed system that takes into account all features of the maintenance and breeding of poultry on a commercial scale. In the development of LED equipment for poultry houses it is important to take into consideration the fact that the tools and lamps are to be operated in a fairly aggressive environment. LEDLIFE lamps are totally resistant to such conditions. LED systems for poultry houses by LEDLIFE reduce electricity costs for up to three times.
